

Lost and Found
Teaching Your Dog How to Track
Sunday, September 16th from 8:30 to 5:00

And How to Have a Great Day Outdoors with Your Dog while *building relationship and trust together*

This seminar welcomes all dogs and handlers of every level of experience. Whether you just want to check out what tracking is about or whether you are working towards an AKC title or thinking about Search and Rescue work. We will open with a very brief overview of tracking, its principals, and theory, how to lay a track and how to read your dog's body language. Then we will be out in the field working our dogs. During lunch I will continue our discussion of the morning after you've had your experience out in the field.

In the afternoon we will continue working our dogs and taking them a little farther with their training. Please bring lots of soft small delicious yummy tiny food bits like chicken, liver, cheese, beef. A comfortable buckle collar and a 6 foot leash will be sufficient for beginners. I will have some harness' available to use for those who wish. Also please bring 4 personal articles like neutral colored gloves (leather or cloth), old wallets, or dark socks. Don't forget water for your dog and yourself.

This tracking fun day will go on rain or shine so you may want to bring outdoor stuff such as rain gear, bug spray, and sun screen too.

Emphasis will be on having a fun day with your dog while doing something your dog loves to do all the time - TRACK.
